

Real-time Inspection & Inventory for Distribution Assets

Inspector Edge

Use existing fleet vehicles to inspect and inventory assets in the field

Inspector Cloud

Expedite the analysis of asset inspection imagery at a low cost in the Cloud

What is this dashboard?

This dashboard will display the device's real-time performance as well as the indication state (ON/OFF) of all nodes. It also gives you the option of running a statistical analysis of the device's previous performance.

How do I use it?

It's really simple! In the Device performance summary report, simply choose the date and device for which you wish to get performance details. Navigate to Device performance analysis reports to review past performance minute-by-minute in a period-by-period analysis chart.

Customize it!

For performance details, choose a date period and a device. Click on the appropriate month, dig down to the time, select the hour, and get minute-by-minute details for the analysis chart.
